

Opmaster 508

Meeting the requirements of day surgeries

- Adjustable and interchangeable head and foot sections.
- Removable dropdown cot sides.
- X-ray translucent table top and cassette tunnels.

True surgical versatility

- Whether you stand or sit during procedures, the 508 has an unobtrusive central column, wide table top and 660mm – 1110mm height range, allowing for precise adjustment to your preferred working position.
- Incorporates trendelenburg and reverse trendelenburg.
- Lateral tilt option.
- Dual safety levers prevent accidental movement of the head section.
- Choice of either head or foot end braking controls.

Simplifies nursing duties

- Optional removable or collapsible side rails give easy all-round access to the patient.
- Collapsible rails have a trapezoidal action to eliminate the risk of trapped fingers.
- Simple patient care via four I/V pole sockets which allow the poles to drop in and remain secure without clamps.
- Equipped with an X-ray translucent table top and cassette tunnels. Full X-ray capacity is available in each section.
- Central support column enables access for a radiography C arm over the full length of the patient's body.

Enhanced patient comfort

- For comfort, the 508 has four 75mm deep anti-static injection moulded, easy clean, rubber mattresses.
- Mattresses are wide enough to allow patients to lie with arms by their side without needing extra I/V arm boards.

Strain-free patient handling

- With 4-section flexibility, the 508 can be used as a chair, patient transport, operating table and recovery bed.
- Dual controls for height and back (single side only with lateral tilt) allow adjustment from both sides and its 90% adjustable foot end significantly improves access in restricted spaces.
- Easy roll castors provide maximum manoeuvrability on any surface, complemented by four-wheel locking, to offer exceptional stability in every configuration.

Exceptional versatility

- Most versatile mobile operating table available today.
- Interchangeable head and foot sections to accommodate different procedures.
- Choice of optional sections for ophthalmics, orthopaedics, obstetrics and gynaecology.
- Full-length accessory bar enables use of a full range of accessories.

Dimensions

- Max height to mattress top: 1110mm
- Min height to mattress top: 660mm
- Length: 1960mm - Length in chair position: 1250mm
- Width over mattress: 600mm
- Width over side rails: 797mm
- Mattress: 75mm - Total weight: 175kg

Adjustments

- Trendelenburg: 25 degrees
- Reverse trendelenburg: 15 degrees
- Foot section: 100 degrees
- Head section: +30/-30 degrees
- Chair position: 60 degrees - Weight capacity: 225kg
